DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/18/06 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 6-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "the décor component" on page 2, line 5 of the claim. There is insufficient antecedent basis for this limitation in the claim. Claim 11 recites the limitation "the décor profile" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Hiers in US Patent 2928696. Hiers discloses a panel adjustment device for a drawer comprising a drawer rail (27) supporting a drawer (23) with a front panel (25), a cabinet rail (18), a lifting and lowering device (31, 32, and 33) having a lifting and lowering element (33) that is movable between predetermined first and second positions (see the positions in Figure 1 versus that in Figure 2), a swiveling axis (the axis of element 21) between the front panel front panel and the lifting and lowering element and spaced at least as far from the lifting and lowering element as from the front panel (Best seen in Figure 1), the lifting and lowering device urging the drawer to swivel with respect to the drawer rail when moved between its first and second positions.

Allowable Subject Matter

6. Claim 16 is allowed.

7. Claims 1 and 6-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

8. Applicant's arguments filed 8/18/06 have been fully considered but they are not persuasive.
9. Regarding applicant's traversal of the refusal to give patentable weight to limitations in Claims 1 and 16: the limitations do not lend any structure to the device of the claim, but merely recite an intended use. If the limitations under question provided specific structural requirements for the device, they would be given equal weight with other structural elements of the claim.
10. Regarding applicant's arguments in view of new Claim 18, please see above rejection.
